

# BE THE GENERATION

TO END THE AIDS EPIDEMIC

Find out how you can make a difference at [www.bethegeneration.nih.gov](http://www.bethegeneration.nih.gov)

Right now, 1 out of every 300 people in the United States has HIV, the virus that causes AIDS. While we have made great progress in the fight against HIV/AIDS, 50,000 people in the U.S. become infected with HIV every year. More research is needed to get to zero new infections. Support biomedical HIV prevention research to end the AIDS epidemic.

The BTG Bridge Project is funded by the Division of AIDS (DAIDS) within NIAID, a part of the National Institutes of Health (NIH), and is a collaboration between HIV Prevention Trials Network (HPTN)/FHI360 and the Legacy Project at the Office of HIV/AIDS Network Coordination (HANC).
